

Tylorstown Group Practice

Are you looking to join a practice as a GP Partner?

Please read on for an exciting opportunity.

Tylorstown Surgery is a 3 Partner practice serving approximately 6000 patients. We took over a single-handed practice in 2021 and have already made dynamic changes in the last 18 months.

We are looking for an additional GP Partner to help expand our young, innovative, and ambitious team. We would support all levels of experience, including those with special interests as we are keen to expand the services we provide.

The practice is in the Rhondda Valley and is approximately 30mins scenic drive from Cardiff against the traffic, making it an easy commute.

The practice team are superb; there is a diverse range of interests, skills, and a first-rate practice manager at the helm. The practice uses Vision and Docman systems and is highly organised, so workflow is efficient. We have an experienced nursing team, a clinical Pharmacist who is an independent prescriber and community physiotherapy to mention just a few of the services available. We offer patients a full family planning service, as well as joint injections, enhanced diabetic care, substance misuse clinics and anticoagulation monitoring. We also support one local care home.

We each currently work 6 sessions a week. We can offer flexibility in the number of sessions and days/hours worked as we have 4 – 8 sessions available.

If you would like an informal discussion/visit or more information, please contact our Practice Manager at kerys.saunders@wales.nhs.uk

You can find more information on our practice website.
